

THE L♥VE WALL

The Love Wall is a metasculpture composed of 10'000 unique colored bricks, each of which is inscribed with the word "LOVE" in 100 languages. Each brick, generated in NFT, gives the purchaser the opportunity to become a patron of this project with profoundly universalist aspirations.

The Love Wall aims to connect our consciousnesses through Love beyond time and space, synchronizing our hearts, like a collective prayer acting on matter to create a better world.

The Love Wall project is destined to develop, evolve and create all the necessary tools for change, through the promotion of higher emotions, via numerous events and exhibitions around the world.

PRESS KIT

Music: Solfeggio Frequency 639 Hz by Tera Mangala
